Press release

## ABC Data dynamically develops the 3D printers and accessories portfolio

For years ABC Data, a leader in the modern IT equipment distribution in the CEE region and [The Best Distributor of Low-Price 3D Printers and Filaments 2015](#), has been developing its IT equipment portfolio on the basis of current trends. As one of the first Polish distributors the company noticed the potential of spatial print and systematically develops its offering in this area. In the nearest future ABC Data is going to enrich its portfolio with 3D printers: The Form 2 and Cube PRO as well as with a handheld 3D scanner – Fuel3D.

When developing a product portfolio ABC Data concentrates on its complementarity. That is why the distributor endeavours to complete the best its product range when selecting new equipment to the offering. The new devices: the low-cost The Form 2 printer, multi-head 3D printers of the Cube PRO series and the low-cost handheld Fuel3D scanner for the distribution of which the company has just signed the agreement naturally enlarge the offering of ABC Data in the field of equipment dedicated to the 3D print.

The first of the new printers – The Form 2 from Formlabs – is a successor of the popular The Form which has been the most commonly bought 3D printer of the SLA technology in history. The device uses resin which is hardened, layer after layer, with laser light, thanks to which a three-dimensional object is created. The equipment is characterised by outstanding accuracy of printing, unavailable to 3D printers working in the FDM technology. The printer set includes a dedicated post-processing station for optimum finishing of the print-outs created.

Cube PRO is in turn a series of multi-head printers from 3D Systems, dedicated to professionals. The printers are available in two versions: Duo which is equipped with two

heads and Trio with three print heads. Moreover, the Cube PRO devices have a heated build chamber and a touch screen which provides easy and intuitive operation of the equipment.

The last of novelties which will be soon available in the ABC Data offering is a handheld, easy to operate 3D scanner – Fuel 3D. Thanks to photometric imaging used simultaneously from two video cameras the scanner allows to remap and treat a 3D model within only several seconds. The device has been designed in a way allowing to scan highly complicated colourful spatial objects. The device has the dedicated SCANIFY software which provides the possibility to prepare a model for the 3D print, for personalisation and 3D animation.

Before a particular model of a printer, a filament or 3D scanner type is offered by the distributor, the ABC Data specialists test it thoroughly. Thanks to this the company knows it offers its partners only reliable solutions. The product range of the distributor currently comprises the following spatial printers: 3D Gence, 3D Kreator, Monkeyfab, Robo 3D and Zortrax. The distributor also offers the following filaments: Verbatim, Spectrum, Devil Design or Orbi-Tech and the Pixelio 3D scanner. In the nearest future the product range will also comprise another attractive products dedicated to the low-cost spatial print domain.

### **About ABC Data S.A.**

ABC Data S.A. is a leader in the market of IT hardware and consumer electronics distribution in Poland and the only entity operating directly in eight Central and Eastern European countries (EU Member States). For over 25 years, the company has been offering computer hardware, software, and consumer electronics. ABC Data has the largest market product range including more than 180 000 products from over 1000 renowned brands. In the recent months, the product portfolio was expanded with new categories, such as smart products, stationery, office equipment, toys as well as tools and power tools. Thanks to continuous development and many years of investment in on-line platforms of customer service, the company is one of the leaders in online sales. Between 2009 and 2016, ABC Data received six EMEA Channel Academy awards for the best distributor in Central and Eastern Europe. In 2015, the company again took the first place in the Computerworld TOP 200 main ranking, thus keeping its status of the largest IT company in the Polish market. ABC Data was the first Polish company to join GTDC, a prestigious association of the largest IT distributors worldwide. In 2010, ABC Data S.A. made its debut on the Warsaw Stock Exchange.
